

EXECUTIVE BIOGRAPHY | Anthony Economos | Co-Founder and President

Throughout his eight-year term as vice president [VP] of Paraclete Aviation Life Support, Anthony Economos accumulated an impressive list of remarkable achievements, starting with the company's 18-month commitment to secure the certifications set forth by the Department of Interior [DOI]-United States Forest Service [USFS] in 2018 to meet the DOI Aviation Helmet Standard.

As one of the two original co-founders of Paraclete, Economos has held the position of VP since its launch in 2014, when the company's long-term strategic plan set forth the executive repositioning in 2022 with Economos assuming the position of president. Economos is best known for cultivating successful collaborations with government entities and corporations in the aviation and medical ecosystem integrating strategic programs while generating revenue and relationships resulting in Paraclete's position as the global provider of DOI-certified civilian aviation helmets

while the growing demand for Paraclete helmets continues to rise.

As a corporate executive leading large-scale projects through intra- and inter-collaborative relationships, Economos finds satisfaction in solving business problems by initiating key relationship to collaboratively implement global solutions to achieve a 'win-win.'

Medical and Aviation Market Entrepreneur

Highlighting his decade of aviation-medical experience, Economos brings extensive experience in Software as a Service [SaaS] operations where he spearheaded technical operations culminating in successful mergers and acquisitions [M&A], with an estimated two-billion-dollar transactional value. In his former position as an executive of Censis Technologies, his natural relational, executive leadership and business acumen earned Economos a seat at the Chief Information Officer [CIO] Council governing all digital transformations for Fortive-owned companies, specializing in healthcare soft/hardware technology systems

While working at Censis, Economos interacted with the nation's foremost experts in surgical asset management while collaborating with over 1,200 hospitals. With his accumulated knowledge in the medical-healthcare industry, Economos has become an asset in advancing Paraclete's air-med transport and helicopter emergency management [HEM] markets.

In addition to his many accomplishments, Economos earned a Master of Business Administration [MBA] degree from Murray State University in 2018 and is currently earning his private pilot's license.

Paraclete Aviation Life Support designs, developments and manufactures civilian aviation helmets and provides Aviation Life Support Equipment [ALSE] training services.
